

VANI PARMAR

SOFTWARE DEVELOPER

+91 9427125733 ◇ vaaniparmar58@gmail.com ◇ Idar, Gujarat, India ◇ [Vani Parmar](#) ◇ [Vani Parmar](#) ◇ [Portfolio](#)

PROFESSIONAL SUMMARY

Software developer with hands-on experience building scalable web applications, intelligent search systems, and secure authentication solutions using Python, Flask, Laravel, MySQL, and SQLite. Skilled in backend development, database integration, and search optimization through internships and practical projects. Passionate about developing reliable software while continuously strengthening backend development expertise.

TECHNICAL SKILLS

Programming Languages Python, PHP, SQL, JavaScript

Frameworks & Libraries Flask, Laravel, SQLAlchemy, RapidFuzz

Databases MySQL, SQLite

Backend Development Authentication Systems, Session Management, MVC Architecture

Tools & Technologies Git, GitHub, Redis

Web Technologies HTML, CSS

Concepts Database Design, Search Optimization, Caching, API Integration, Multithreading, Secure Authentication, OOP, DSA(Basic)

PROFESSIONAL EXPERIENCE

Software Development Intern

Jan '26 — Present

Brainbean Technolabs

- Developed Scout, an intelligent product search system using Python and Flask, implementing semantic search, fuzzy matching, and intelligent ranking.
- Built backend modules for multi-database synchronization, caching, and search optimization to improve application performance.
- Enhanced backend security by implementing passkey authentication and optimizing database operations.
- Technologies: Python • Flask • SQLite • Redis • RapidFuzz • MySQL • Laravel

Cyber Security Intern

Aug '25 — Dec '25

HackLearn

- Developed Python scripts to support vulnerability assessment and automate network reconnaissance tasks.
- Performed security testing on web applications using Nmap, DVWA, and Metasploitable in a controlled environment.
- Documented findings and recommended remediation approaches while strengthening secure coding practices.
- Technologies: Python • Kali Linux • Nmap • DVWA • Metasploitable • Netdiscover

Cyber Security Intern

Jun '25 — Jul '25

InternPro(AICTE)

- Collaborated on developing a Password Manager using Python and Flask.
- Implemented user authentication and backend data management using SQLite.
- Participated in application testing, debugging, and technical documentation while following secure coding practices.
- Technologies: Python • Flask • SQLite • SQLAlchemy • Kali Linux

PROJECTS

Scout – Intelligent Product Search System

- Developed a secure intelligent product search system supporting fuzzy matching, synonym expansion, typo correction, and relevance-based ranking.
- Implemented multi-database synchronization and caching mechanisms to improve search performance and data consistency.
- Built administrative analytics dashboards for monitoring search activity and application usage.
- Designed backend architecture using Flask and SQLite with emphasis on secure application development.

CipherVault – Secure Password Manager

- Designed and developed a secure password management application with master-password authentication and encrypted credential storage.
- Implemented secure authentication workflows to protect sensitive user credentials and prevent unauthorized access.
- Applied secure coding practices and followed MVC architecture for maintainable backend development.
- Utilized SQLAlchemy with SQLite for efficient credential management and secure data storage.

Network Scanner

- Developed a GUI-based network scanner to automate host discovery, port scanning, operating system detection, and service enumeration using Nmap.
- Implemented multithreading to improve scanning efficiency and reduce scan execution time.

- Integrated a local vulnerability database to correlate detected services with potential security risks.
- Generated structured PDF, CSV, and JSON reports to support security assessment and documentation.

Web-Based Intelligence & Reconnaissance Platform

- Developed an automated reconnaissance platform for OSINT-based information gathering and asset discovery.
- Integrated multiple intelligence sources including WHOIS, DNS, Shodan, VirusTotal, URLScan, and Nmap to collect security-relevant information.
- Automated subdomain enumeration, DNS resolution, technology fingerprinting, and reputation analysis.
- Generated consolidated PDF, CSV, and JSON reports to support vulnerability assessment and security investigations.

EDUCATION

Bachelor of Technology in Agricultural Information Technology, Anand Agricultural University Dec '22 — Present
(GPA: 7.32/10.0)

- Final CGPA: 7.32/10.0

CERTIFICATIONS & PROFESSIONAL TRAINING

HackOrbit Nation Hackathon 2025, MITS, Gwalior Jan '25

Geodata Processing using Python & Machine Learning, Indian Institute of Remote Sensing (IIRS)

Cyber Security Professional Training, The Tech Unique

Cyber Security Virtual Job Simulations (10+)

CO-CURRICULAR & AWARDS

- University Women Champion of Athletics 2024–25 (100m, 200m, Long jump, 4x100 Relay) & 2025–26 (100m, Long jump, Discus Throw)
- District Level Skating Champion U-17 2020, 2022, 2024, 2025
- College Secretary – AIASA 2024
- NSS Certified Student Volunteer
- Basic Mountaineering Course completed with A grade
- Athletics & Volleyball University Player 2025
